DETAILED ACTION

Allowable Subject Matter

- 1. Claims 1-14 are allowed.
- 2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 4,556,888 to McNaul is the reference closest to the claimed invention. McNaul discloses apparatus for determining the polarization of a signal having vertical and horizontal components comprising: (a) one or more registers for storing the first series of sample values representing a horizontal component of the signal and for storing a second series of sample values representing a vertical component of the signal. However, McNaul does not teach (b) a plurality of sets of cyclically operative calculation elements being arranged to combine values in said first and second series with one another so as to provide one or more output values for each cycle and thereby provide one or more output values for each cycle, said different ones of said sample values being arranged to supply to each such set on successive cycles of operation, whereby each such set will provided one or more series of output values when operated through a plurality of cycles, different ones of said sets of calculation elements being arranged to combine values according to different transfer functions, at least some of said sets of calculation elements being operative in parallel with one another and (c) one or more evaluation circuits connected to at least some of said sets of calculation elements so as to receive the series of output values provided by such sets, said one or more evaluation circuits being operative to compare one or more characteristics of at least some of said series of output values and select one or more series having preselected characteristics and thereby identify the set of

calculation elements which provided such one or more series and provide information about the polarization of the signal; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact Information

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carol S. Tsai whose telephone number is (703) 305-0851. The examiner can normally be reached on Monday-Friday from 7:30 AM to 4:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marc S. Hoff can be reached on (703) 308-1677. The fax number for TC 2800 is (703) 308-7382. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the TC 2800 receptionist whose telephone number is (703) 308-1782.

In order to reduce pendency and avoid potential delays, Group 2800 is encouraging FAXing of responses to Office actions directly into the Group at (703) 308-7382. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the
